CERTIFICATE OF FACSIMILE TRANSMISSION

The undersigned hereby certifies that this document is being transmitted by facsimile to the U.S. Patent and Trademark Central Office at Facsimile No.571-273-8300 on October 31, 2005.

Jan/L Mellen

Mail Stop Amendment Commissioner for Patents P.O. Box 1450 Alexandria, VA 22313-1450

In response to the office communication dated October 13, 2005, applicant provides the following information:

- 1. A prior art search was performed in the USPTO on-line database of issued patents. Art retrieved from that search has already been submitted to the USPTO by means of an information disclosure statement filed on July 11, 2001. However, it is noted that there is no evidence that this information disclosure statement was considered by the examiner, and accordingly, a copy of the disclosure statement is attached. As all of the references are issued U.S. Patents, copies of the references are not enclosed.
- 2. The product timeline is as follows. *the* workplace HELPLINE LLC was priginally founded as Employee Assistance Resources LLC (EAR) in August of 1996. The

1

business plan was determined to be unsustainable in 1997 and EAR was renamed the workplace HELPLINE in that year. The revised business plan focused on services to the employer and their unique issues, and not the employee.

HELPLINE secured its first client in late 1997, however services were never initiated and the client went out of business. In the spring of 1998, several marketing contracts were signed with national associations along with the first insurance company client. A toll-free number was set up and a Windows based software system was used to serve clients. The Windows based system had two databases: one located in a specialist's office and one located at HELPLINE headquarters. The specialist received phone calls from employer cortacts via the toll-free telephone line and entered information into the local database.

Periodically (usually once per day) a direct dial-up connection was established between the specialist database and the HELPLINE database so that information could be exchanged. During this exchange, information regarding new clients was sent from the HELPLINE database to the specialist database and information regarding calls received from existing clients was sent from the specialist database to the HELPLINE database. By the summer of 1999 the actual user base had grown substantially and, when more than one specialist was involved, it became difficult to synchronize all of the databases. If addition, if any changes to the specialist software were required, it was necessary to visit the specialist location to make software updates. Finally, there was no way to publish information to the client via the toll-free telephone line.

Thus, it became apparent that the company could no longer use the edisting software. Design and development of a new Internet-based system was started in the summer of 1999. As best can be determined, a beta version of a program that incorporated the features of the current claims was deployed on ebruary 16, 2000. The beta system was run in parallel with the existing Windows based

system and in either March or April 2000, HELPLINE began using the new version in its day-to-day business.

Since the new system was placed in use several other versions have been deployed which incorporate some new features.

3. Articles that were authored by the applicant include an article entitled. Value-added Services...They can be more than Window Dressing", The Betterley Report, EPLI Market Survey, August 2000.

Applicant was also quoted in Risk & Insurance Magazine, February 2002 and Risk Management Magazine, January 2001, pp 23-25.

4. Applicant does not know of, and has not discovered, any prior art articles or publications that were relied upon to develop the disclosed subject matter. As far as applicant knows the disclosed subject matter represented a method for providing workplace services that differed and continues to differ substantially from competitive services that were and are now available. These competitive services use a toll-free telephone number and web pages.

Respectfully submitted

Paul E. Kudirka, Esq. Reg. No. 26,931
